

Diagrama E-R en MySQL Workbench

Ejecución del Script de creación de tablas e insert de datos

The screenshot displays the MySQL Workbench interface. The left sidebar shows the 'SCHEMAS' list with 'boupetique_db' selected. The main window shows the SQL File editor with a script titled 'boupetique.sql'. The script contains the following SQL statements:

```
1 -- Crear la base de datos
2 CREATE DATABASE IF NOT EXISTS boupetique_db;
3 -- Seleccionar la base de datos para trabajar en ella
4 USE boupetique_db;
5 CREATE TABLE brands (
```

The bottom panel shows the 'Output' tab with the execution results of 27 statements. The statements include creating tables, inserting data, and dropping databases. The output shows the number of rows affected and the duration of each statement.
